US-60-324-185-29531 RESULT 10 APPLICANT: Mortis, MacDonald
APPLICANT: Lal, Preeti
APPLICANTION: POLYNUCLEOTIDE SEQUENCE DATABASES, AND SINGLE NUCLEOTIDE
TITLE OF INVENTION: POLYMORPHISMS IDENTIFIED THEREBY
FILE REFERENCE: GX-0019-1 P
CURRENT APPLICATION NUMBER: US/60/324,185
CURRENT EILING DATE: 2001-09-21
NUMBER OF SEQ ID NOS: 35862
SOUTWARE: PERL Program
SEQ ID NO 29531
LENGTH: 3814
TYPE: DNA
TYPE: DNA Sequence 29531, Application GENERAL INFORMATION: US/60324185

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    double-stranded cDNA was size selected, ligated to Eco RI adapters (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of a modified pTTT3 vector (Pharmacia). The retinas were obtained from a 55 year old Caucasian and total cellular poly(A)+ RNA was extracted 6 hrs after their removal. The retina RNA was kindly provided by Roderick R. McInnes M.D. Ph.D. from the University of Toronto. Library constructed by Bento Soares and M.Fatima Bonaldo. "

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Score
